

More Versatile than Concrete

Concretum Hightech Concrete

Concretum Hightech Concretes meet all necessary requirements. They are mainly used for exposed and heavily loaded concrete structures. Resistance and durability are unique. Typical applications are the maintenance of traffic structures, the production of precast concrete elements and the casting of concrete pavements such as roads and industrial floors.

- Premiumbetone
- Fibers
- Trockenbetone/-mörtel
- Betonzusatzmittel

Thanks to the advantages of Concretum Hightech Concretes, innovative constructions are becoming easier, faster and more reliable.
